

SYSTEM ADMINISTRATOR

AJMAL MALAYIL

System Administrator with 6+ years of experience across IT infrastructure, cybersecurity, cloud, IoT, and end-user support. Strong expertise in Windows/Linux, Active Directory, Azure, AWS, Microsoft 365, Google Workspace, and identity & access management (IAM/RBAC). Proven hands-on experience with endpoint security (EDR/XDR), phishing simulation, threat detection, incident response, and backup & disaster recovery. Recognized for supporting 350+ users, improving uptime, automating operations, and securing hybrid environments aligned with business needs.

TECHNOLOGY STACK & TOOLS

Windows | Linux | Windows Server |
Active Directory | VMware | Hyper-V |
KVM | Azure | AWS | Microsoft 365 |
Google Workspace | Firewalls | VPN |
Nmap | CrowdStrike | EDR | XDR | SIEM
| SOAR | Phishing Defense | PowerShell
| Bash | Ansible | Zabbix | Nagios |
Intune | SCCM | IAM | PAM | SSO | MFA
| DLP | API Integration | WordPress |
Brevo | GenAI | IoT Platforms

Core Focus: System Administration | Cybersecurity | Cloud & Infrastructure

EXPERIENCE

SYSTEM ADMINISTRATOR

EliteVAD FZCO Jul 2024 - Present

- Administer Microsoft 365, Teams, Google Workspace, and Active Directory (RBAC) to strengthen identity and access management across the organization.
- Provide L2/L3 IT support for 350+ end users across multiple sites, maintaining system reliability, performance, and SLA compliance.
- Deploy and manage endpoint security solutions (EDR/XDR), phishing simulation, and threat prevention controls to enhance organizational cybersecurity posture across endpoints, networks, and cloud workloads.
- Implement enterprise-wide backup and disaster recovery automation, reducing downtime and incident response time by 35%.
- Manage hybrid infrastructure across on-premises, Azure, AWS, ESXI and VPSie environments, including networking components (VLANs, TCP/IP, DNS, DHCP, routing, firewalls to ensure high availability, scalability, and seamless connectivity.
- Handle physical infrastructure operations, including servers, network switches, racks, cabling, patch panels, and hardware lifecycle management.
- Oversee website management (WordPress), updates, uptime monitoring, and security hardening.
- Support digital and email-based campaigns in coordination with presales and marketing teams.
- Conduct technical presentations, demos, and workshops to improve customer and internal understanding of cybersecurity, IoT, ERP, and cloud solutions.
- Support presales and bid management activities, including RFP responses, technical solution design, risk assessment, and coordination with cross-functional teams for cybersecurity, IoT, ERP, and cloud infrastructure projects.

TECHNICAL SUPPORT EXECUTIVE

Synosys Technologies LLC (Locator)

Dec 2022 – Jul 2024

- Delivered technical training, demonstrations, and onboarding for 1,500+ users on IoT platforms, vehicle tracking systems, and endpoint-security best practices, ensuring effective product adoption.
- Led IoT software integration, customization, application testing, and bug reporting, collaborating closely with development teams while providing L1/L2 technical support, resolving 90%+ tickets within SLA.
- Performed data scraping and data extraction using built-in and custom scrapers, preparing actionable datasets and assigning qualified leads to sales and operations teams.
- Managed networking devices, cloud accounts, CRM systems, and email platforms for SME clients, ensuring system stability, connectivity, and minimal downtime.
- Executed large-scale digital campaigns using email, WhatsApp, and SMS platforms, delivering 100,000+ outbound communications per campaign cycle in coordination with marketing teams.
- Conducted on-site customer visits across the UAE for system deployment, user setup, troubleshooting, and monitoring of vehicle tracking and IoT-enabled assets, ensuring service continuity and customer satisfaction.

SYSTEM ENGINEER

Delta Solution

Jan 2020 – Nov 2022

- Installed, configured, and supported Windows/Linux operating systems, enterprise applications, and end-user software, resolving hardware and software issues to improve workstation performance and security.
- Deployed OS images and configured workstations for 1,000+ users across multiple client sites, ensuring standardized builds and smooth onboarding.
- Provided Tier-1 and Tier-2 technical support for hardware, software, networking, and application-related issues, resolving 85%+ tickets at first contact.
- Performed system troubleshooting, upgrades, patch management, data backup & recovery, and hardware component replacements.
- Reduced system downtime by 40% through preventive maintenance, structured documentation, and proactive issue resolution.
- Configured and managed network devices, LAN/WAN connectivity, printers, scanners, routers, and IT peripherals, ensuring stable and secure operations.
- Assisted with software rollouts, system migrations, updates, and hardware refresh projects, maintaining business continuity and compliance.
- Managed user accounts, access controls, and endpoint configurations, supporting secure and reliable day-to-day operations.
- Maintained accurate service records and technical documentation, ensuring timely follow-ups and improved customer/end-user satisfaction.
- Delivered on-site and remote technical support to enterprise and SME clients, collaborating with vendors and internal teams as needed.
- Performed system customization according to user requirements (e.g., gaming, editing setups) to enhance productivity

CORE TECHNICAL COMPETENCIES

System Administration : Windows Server, Linux, Active Directory, Group Policy, DNS, DHCP, RBAC, Backup & Disaster Recovery

Networking & Infrastructure : Network Design, VLANs, Firewalls, VPNs, TCP/IP, DNS, DHCP, Nmap, Routing, Monitoring, Cabling & Patch Panels

Cybersecurity Operations : Threat Detection & Response, EDR/XDR, SIEM/SOAR, Phishing Simulation, IAM, PAM, MFA, Policy Enforcement, DLP, Incident Response

Cloud & Virtualization : Microsoft 365, Google Workspace, Azure, AWS, VMware, Hyper-V, KVM

IT Support & Operations : SLA-Driven L2/L3 Support, Remote Troubleshooting, Hardware & Software Deployment, Endpoint & Peripheral Support

Automation & Endpoint Management : PowerShell, Bash, Ansible, Intune, SCCM, Zabbix

ADDITIONAL EXPERTISE

- IoT Device Configuration & Integration
- Software & Platform Licensing
- Presales Support, POC Development & Product Demonstrations
- Website Management, Digital Campaigns & Online Branding
